- (b) Required coverage. In addition to the coverage required under § 457.410(b), benchmark-equivalent health benefits coverage must include coverage for the following categories of services:
- (1) Inpatient and outpatient hospital services.
- (2) Physicians' surgical and medical services.
  - (3) Laboratory and x-ray services.
- (c) Additional coverage. (1) In addition to the categories of services in paragraph (b) of this section, benchmark-equivalent coverage may include coverage for any additional services specified in § 457.402.
- (2) If the benchmark coverage package used by the State for purposes of comparison in establishing the aggregate actuarial value of the benchmarkequivalent coverage package includes coverage for prescription drugs, mental health services, vision services or hearing services, then the actuarial value of the coverage for each of these categories of service in the benchmarkequivalent coverage package must be at least 75 percent of the value of the coverage for such a category or service in the benchmark plan used for comparison by the State.
- (3) If the benchmark coverage package does not cover one of the categories of services in paragraph (c)(2) of this section, then the benchmark-equivalent coverage package may, but is not required to, include coverage for that category of service.

## § 457.431 Actuarial report for benchmark-equivalent coverage.

- (a) To obtain approval for benchmark-equivalent health benefits coverage described under §457.430, the State must submit to CMS an actuarial report that contains an actuarial opinion that the health benefits coverage meets the actuarial requirements under §457.430. The report must also specify the benchmark coverage used for comparison.
- (b) The actuarial report must state that it was prepared—
- (1) By an individual who is a member of the American Academy of Actuaries;
- (2) Using generally accepted actuarial principles and methodologies of the American Academy of Actuaries;

- (3) Using a standardized set of utilization and price factors;
- (4) Using a standardized population that is representative of privately insured children of the age of those expected to be covered under the State plan;
- (5) Applying the same principles and factors in comparing the value of different coverage (or categories of services):
- (6) Without taking into account any differences in coverage based on the method of delivery or means of cost control or utilization used; and
- (7) Taking into account the ability of a State to reduce benefits by considering the increase in actuarial value of health benefits coverage offered under the State plan that results from the limitations on cost sharing (with the exception of premiums) under that coverage.
- (c) The actuary who prepares the opinion must select and specify the standardized set and population to be used under paragraphs (b)(3) and (b)(4) of this section.
- (d) The State must provide sufficient detail to explain the basis of the methodologies used to estimate the actuarial value or, if requested by CMS, to replicate the State's result.

## § 457.440 Existing comprehensive State-based coverage.

- (a) General requirements. Existing comprehensive State-based health benefits is coverage that—
- (1) Includes coverage of a range of benefits:
- (2) Is administered or overseen by the State and receives funds from the State;
- (3) Is offered in the State of New York, Florida or Pennsylvania; and
  - (4) Was offered as of August 5, 1997.
- (b) Modifications. A State may modify an existing comprehensive State-based coverage program described in paragraph (a) of this section if—
- (1) The program continues to include a range of benefits;
- (2) The State submits an actuarial report demonstrating that the modification does not reduce the actuarial value of the coverage under the program below the lower of either—
